

SCIENCE

SCIENCE

States of matter

- Compare and group materials together, according to whether they are solids, liquids or gases
- Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature (Writing: Explanation of the water cycle)
- Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees

Animals, including humans

- Describe the simple functions of the basic parts of the digestive system in humans
- Identify the different types of teeth in humans and their simple functions
- Construct and interpret a variety of food chains, identifying producers, predators and prey.
